

FLEXTOOL CUB GRINDER ART-CUB

The Flextool Cub Grinder is compact in design and delivers exceptional grinding capability across a wide range of applications. Grinding efficiency is optimised through the placement of the motor directly above the grinding head, providing extra weight during operation.

Featuring motor overload protection, a height-adjustable handle and choice of vacuum or water connection, this machine is designed with the user in mind. The direct-drive coupling design means there are no drive belts that require ongoing adjustments, greatly reducing maintenance.

Ideal for small size projects on residential and custom commercial work.

SINGLE HEAD GRINDER

Electric motor

1.8 kW electric motor for use with standard 10 Amp power outlet

Fold-down lifting handle

For easy manoeuvrability

Direct-drive coupling

- No drive belts that require ongoing adjustments
- Greatly reduces maintenance

Lifting hook
Easy and safe on-site handling

Motor overload protection
For improved operator safety

Folding handle
For easy transport and storage

Height-adjustable handle
For superior ergonomics and operator comfort

Dust outlet and water connection

For connection with vacuum system or water tap for complete dust control
