

CONCRETE VIBRATION

FLEXTOOL® PORTAVIBE® BACKPACK

The Flextool PortaVibe Backpack concrete vibrator combines performance and comfort. The ergonomic contouring aluminium frame design and 4-point fully adjustable padded harness evenly distribute weight to both shoulders and hips to improve user comfort whilst reducing back strain and fatigue.

Heavy duty yet lightweight frame

- Fully welded aluminium for extra strength

Honda GX35 engine

- Hassle free operation
- Low engine emissions

Easy access control

- Swing control arm for easy RPM adjustment and access to emergency shut off switch

Vibration isolators and swivel base

- Isolates vibration transfer to the operator
- Swivel base for improved manoeuvrability and reduced back strain

Storage pouch

- Safely store personal items such as smart phones

Fully adjustable 4-point harness

- Even weight distribution for improved comfort
- Breathable padding
- Heavy duty nylon fabric for strength and easy cleaning

Flexshafts

- Available in 2 m & 3 m lengths
- Rubber support sleeve for reduced vibration transfer to operator

Vibrator head

- Available in 34 mm & 44 mm diameters
- Hardened steel for extended service life

Quick connect fitting

- Quick screw fitting for easy fitting of flexshaft

POWERED by
HONDA
